## SINGLE MALTS

### THE RARE WHISKY

#### VIVANTA BY TAJ

**PRIVATE RESERVE ABERLOUR 1993, 17 years, Speyside 1600**

**The Whisky:** From the carefully selected stock of Duncan Taylor Scotch Whisky Ltd, Whisky Magazine and a guild of connoisseurs from Vivanta by Taj, have handpicked this exclusive bottle for whisky aficionados like you. Distilled at Aberlour using crystal clear spring water from the River Lour and matured in a single hogshead, the Vivanta by Taj Private Reserve is a wonderful expression of this rare whisky.

**Nose :** Initial vanilla and toffee aromas followed by oranges and a sweet maltiness. Quite creamy with a hint of liquorice.

**Palate :** Citrus notes of lime zest and tangy orange coupled with brown sugar and toffee apples.

**Finish :** Soft creamy finish with heavier fruits dominated by black cherries and figs, with a lingering caramel toffee note.

#### SPEYSIDE

The Speyside area is situated at the north of the Cairngorm Mountain and goes to the Moray Firth. Two rivers delimit it namely the Findhorn at the west side and the Deveron on the east side. The area is named after the river Spey. Most of the distilleries take their water from one of its affluent; the Fiddich, the Livet or the Avon. Speyside whiskies are essentially sweet. They have a little peaty character and have a whiff of smoke and their salient characteristic is estery. They take maturation in sherry-wood well and can be rich and full bodied, medium and light-bodied.

#### HIGHLANDS

This is the mountainous part of Scotland where streams tumbling over granite, heather hills and green glens introduced interesting flavours and aromas to the malt whiskies. Whisky produced here uses water that has flowed over peat bogs, which impart a smoky flavour.

## LOWLANDS

Lowlands whiskies generally have a dry finish, which makes them excellent aperitifs. The dryness comes from the malt itself, not from peat as Lowland tends to use unpeated malt and this also lends a certain sweet fruitiness to the flavour and mouthfeel. Their aromatic intensity is low, and tends to be grassy or herbal, with grainy and floral notes.

**GLENKINCHIE 12 years 400**

#### ISLAY

The Island of Islay (pronounced Eye-la') is the south of the Western Isles, and lies on the eastern side of Kintyre. It is flat, green and very largely composed of peat – the water on the island is brown with it. Winter gales drive salt spray far inland, and this saturates the peat, which is dried again by the briny, seaweedy breeze and these characteristics gives way to flavour its malt.

**LAGAVULIN 16 years 600**

**CAOL ILA 12 years 450**

#### SKYE

The golden spirit of Skye has more than a hint of local seaweed, peppered with sweet and sour notes, and a memorable warm peaty finish.

**TALISKER 10 years 450**

#### ISLE OF JURA

This is a spectacularly beautiful part of Scotland with exceptional views. The malts whiskies produced on the island of Jura have a fresh, floral aroma which reflects this beautiful, wild and lonely island.

## BLENDING SCOTCH WHISKY

The world whisky conjures up a picture of an amber-coloured liquid with a range of taste and aromas. Add the word scotch to it and a range of other images come to mind. The word whisky reputedly derives from Gaelic, "uisge beatha" – water of life. Savour this delightful potion from our premium selection.
